

Martyn Chamberlain

Martyn Chamberlain has been working for 10 years as a Scientific Project Manager at the European Commission, firstly in DG Research & Innovation and currently in DG Information Society & Media. He previously worked for FORD Automotive Systems and Visteon Automotive Systems managing multimedia CD/Radio system projects for Skoda, DaimlerChrysler and FORD. His initial research career was investigating electron-phonon interactions and Raman Scattering in III-V semiconductor quantum well nanostructures. He completed his PhD in Theoretical Physics at the University Of Essex, UK and then completed further research fellowships at Durham and Essex Universities in the UK and the Max-Planck-Institut für Festkörperforschung in Stuttgart, Germany.
